

***Start each day with a sense of purpose.  
End each day safely with a sense of accomplishment.***

*That's the kind of outlook we are striving to achieve for our employees at Spectra Energy (formerly a Duke Energy Operation). We value diversity and inclusion, openness and teamwork. Ours is a high-performance culture where you're encouraged to stretch your capabilities and exercise creativity in effecting change and shaping the future.*

*Spectra Energy is one of North America's premier natural gas midstream companies with critical energy infrastructure connecting natural gas sources to markets and customers. Our approach extends beyond our offices and facilities into our neighbourhoods, towns and cities—through community and economic development partnerships, we cultivate talent and grow leadership.*

**Position:** Pipeline Integrity Specialist

**Company:** Spectra Energy Transmission West

**Closing Date:** February 28, 2010

**City:** BC-Vancouver

**Area of Expertise:** Technology

**Highest Level of Education:** Technical School/Associate

**Job Type:** Full Time

**Job ID:** LWH20102601-00233

**Years of Experience:** 5-8 years

**Key Responsibilities:**

Provide technical support to the Pipeline Integrity Management Program

Manage Risk Assessments within the pipeline Integrity program.

Technical assistance to operations, operations engineering, capital projects and regulatory affairs with respect to all issues that would affect pipeline integrity; for example; operations / maintenance procedures, practices, and applications, integrity data management, materials selection, corrosion control and corrosion growth rates, standards codes and specifications, inline inspection, and incident analysis.

**Basic Qualifications:**

Minimum of 5 years experience in the operation, design or construction of pipelines.

Good computer skills

Ability and willingness to travel both domestically and internationally including a valid Canadian drivers license.

Demonstrated ability to write technical documents such as procedures and specifications.

Good verbal communication in the English language and good interpersonal skills.

**Desired Qualifications:**

A university degree in engineering or a relevant technical diploma.

Good knowledge of CSA Z662 and other standards and codes associated with Canadian pipelines.

A specialized knowledge or recognized expertise in one or more of the areas of welding, non-destructive testing, risk assessment, codes and standards, inline inspection or pipeline materials.

Demonstrated ability to work independently, and to initiate, build and implement pipeline integrity programs that provide measurable results.

**Comments:**

This position will require traveling to other Spectra Energy field facilities located in Western Canada.
